LEC Partners with A-tech to Expand Award-Winning iQ2™ IIoT Technology Offering to Industry in Southwest United States

Jackson, MS -- LEC, leaders in automation control engineering and Industrial Internet of Things (IIoT) enablement, today announces its new partnership with Tulsa, Oklahoma-based automation solution provider A-tech, Incorporated.

The LEC and A-tech alliance was developed to further expand the offering of LEC's award-winning iQ2 IIoT technology to industrial clients in Oklahoma, Arkansas, Kansas, Colorado, Northern Texas, North Louisiana, and Wyoming.

"Partnering with LEC and their cloud-based platform of products is a natural fit for A-tech, Inc. LEC's IIoT professional services will increase our ability at A-tech to help our customers find the best solutions for their automation challenges. We look forward to pairing our existing product lines with LEC's technology as we move forward," said Clay Hodgens, A-tech Principal.

iQ2 is LEC's cloud-based, end-to-end IIoT platform solution that's uniquely designed from an industrial automation engineering perspective to address individual needs and provide secure, customizable remote control, monitoring, and data collection to all areas of industry.

"A-tech's portfolio of industrial products aligns incredibly well with LEC's market and vertical focus in oil and gas, manufacturing and OEM's," states Brian Rosema, VP of IIoT for LEC. "Additionally, their client-focused culture parallels with LEC's in our efforts to eliminate the confusion for those looking to implement an IIoT solution. LEC is truly fortunate to be collaborating with such a highly reputable and successful organization."

Since its establishment in 1989, LEC has excelled in providing innovative and groundbreaking industrial automation control engineering and IIoT technology, such as the cutting-edge iQ2 platform, launched in 2018, and its secure private IIoT cellular network.

About LEC

LEC provides industrial automation control engineering, and industrial IoT (IIoT) enablement and cloud platform services of the highest quality with an unending commitment to our Clients, Strategic Partners, and Communities. Through Client and Partner engagement, technical innovation, research, and investment in the brightest human resources, we engineer smarter systems to achieve complete satisfaction of those we serve. With each project, our goal is to establish a new standard of quality and professionalism. www.LECINC.com

About A-tech

Since 1977, we have aligned the A-tech name with the absolute best brands in heaters, sensors, controls, and instrumentation. Drawing from more than 50 top manufacture lines, our sales engineers can bring together products and specify a solution you know will perform. With our diverse, \$1M on-site inventory, we can ship your parts fast. We also host helpful training events to share the latest automation innovations and trends with our customers.
