LEC Partners with Rock Interface to Provide Award-Winning iQ2™ IIoT Technology to Midwest Industry

Jackson, MS -- LEC, leaders in automation control engineering and Industrial Internet of Things (IIoT) enablement, today announces its new partnership with Rock Interface to further expand the offering of iQ2's award-winning technology to industrial clients in the Midwest.

Rock Interface is a Grand Rapids, Michigan-based company that specializes in providing superior industrial automation control solutions.

"At Rock Interface, we are considered one of the top remote monitoring system providers in Michigan. We are excited to partner with LEC, a leading IIoT platform provider, to further strengthen our position in the marketplace and look forward to building a successful partnership," said Mike Dorato, Rock Interface's CEO.

iQ2 is LEC's secure, end-to-end IIoT platform solution that's designed from an industrial automation engineering perspective to address individual needs and provide remote control, monitoring and data collection to all areas of industry.

"Rock Interface has a long history of service excellence combined with an acute understanding of industrial automation and the needs of clients within their footprint," said LEC's Vice President of IIoT Strategy Brian Rosema. "We know from working directly with Rock Interface on various large and small projects in the past that LEC is fortunate to be bringing them into our IIoT ecosystem."

Since its establishment in 1989, LEC has excelled in providing innovative and groundbreaking industrial automation control engineering and IIoT technology, such as the cutting-edge iQ2 platform, launched in 2018.
