LEC Partners with Rock Interface to provide Award-Winning Technology

Posted by: MBJ Staff in [Newsmakers](#), [Technology](#) June 18, 2019

LEC, leaders in automation control engineering and Industrial Internet of Things (IIoT) enablement, today announces its new partnership with Rock Interface to further expand the offering of iQ2's award-winning technology to industrial clients in the Midwest.

Rock Interface is a Grand Rapids, Michigan-based company that specializes in providing superior industrial automation control solutions.

iQ2 is LEC's secure, end-to-end IIoT platform solution that's designed from an industrial automation engineering perspective to address individual needs and provide remote control, monitoring and data collection to all areas of industry.

Since its establishment in 1989, LEC has excelled in providing innovative and groundbreaking industrial automation control engineering and IIoT technology, such as the cutting-edge iQ2 platform, launched in 2018.

LEC's iQ2 platform technology is immediately available via Rock Interface.

Moving Industry Forward Since 1989
